

LEAD SERVICE REPLACEMENT PROGRAM

Based on preliminary evaluations, the replacement of the private side of lead service lines should cost between **\$ 2,000 to \$ 7,500** to replace. If you would like to receive a Not-To-Exceed price for our contractor to perform the work for you, please check the box below.

PLEASE CONTACT ME REGARDING A FINAL NOT-TO-EXCEED (NTE) ESTIMATE.

I understand that this statement of interest does not obligate me at this time to replace my service line nor is it a binding contract, and that I will make myself available for communications and signing of a contractual agreement with Providence Water before the replacement begins.

I understand that I am responsible for the costs of replacing the portion of the lead water service line that I own.
