

PROVIDENCE WATER
WATER MAIN REPLACEMENT/REHABILITATION (WMR) PROGRAM
Wayland/Blackstone Neighborhoods, Providence (2015-2)

Scope: Systematic replacement and/or rehabilitation of (undersized) 6", 8", and 12" unlined, 100 year old cast iron water mains.

Reason: To resolve historic, tracked water quality issues from customers, such as discolored water and low pressure. Also, to rehab water mains in advance of roadway pavement upgrades by City or State.

Schedule: An April 2016 start of Cleaning & Cement Lining and Replacement of existing water mains for the 2016 construction season. Temporary surface restoration to be followed by Permanent surface restorations after a 60 day settlement period.

FAQs: Clean & Cement Line - 35,300 LF

Streets (Cleaning & Cement Lining of Existing Water Mains):

Providence - Wayland/Blackstone Area (Primary Roads): Blackstone Blvd

Providence - Wayland/Blackstone Area (Secondary Roads): President Ave, Arlington Ave, Kingston Ave, Taber St, Miles Ave, Elmgrove Ave, Hobart Ave, Edison Ave, Cole Ave, Lorraine Ave, Slater Ave, Lloyd Ave, University Ave, Irving Ave, Elton St, Humboldt Ave, and Villa Ave

Various Locations: Small Water Main Replacements or short Water Main Tie-ins

Operations: Install surface water bypass piping, connect businesses/homes to bypass piping, excavate access pits, clean & cement line existing water mains, install new ductile iron water main where necessary, install new valves and hydrants, replace any encountered lead water services (replace homeowner lead service if requested), disinfect newly lined and new mains and appurtenances, backfill access pits and activate newly lined water main, install temporary pavement, disconnect and remove bypass piping, install permanent pavement (after 60 day settlement period).
